OPTION: MexBASS und MexGUITAR und MexGROOVE

MexBASS ist ein geniales Verfahren um via MIDI den eingeschränkten Bassbereich vom Instrument (ca. 1 Oktave) auf ca. 3 Oktaven zu erweitern
= **perfekt für den LIVE Einsatz!**

Die Algorithmen von MexBASS liefern Dir ein akustisch korrektes Bassspiel über 3 Oktaven, ohne dass Du deine Spielweise ändern musst.

Es können alle Sounds verwendet werden, die **SOUNDBANK 35** enthält speziell für MexBass gesampelte Sounds.

MexGUITAR ist ein neu entwickeltes Verfahren um via MIDI auf Basstastendruck eine korrekt spielende Begleitgitarre (für volkstümliche Musik) zu erhalten. Somit erhältst Du bei wechselseitigem Spielen der Bass- und Akkordtasten eine akustisch real klingende Gitarrenbegleitung.

Die **SOUNDBANK 33** enthält speziell für MexGuitar gesampelte Gitarren.

MexGROOVE bedeutet, du spielst wie gewohnt und das System macht automatisch die sogenannte Oberkrainerbegleitung dazu. Besser bekannt ist das Ganze unter dem Namen "Schättern"

MexGROOVE kann grundsätzlich für alle Basssounds verwendet werden, ist aber nur in Verbindung mit dem LIMEX Soundboard G5 und Soundboard G5+ verwendbar.

Deine Spielweise musst Du nicht ändern!

Fusspedalfeatures

- Bass kurz/lang
- Gitarre kurz/lang
- Solo Bass
- Arpeggio

Systemvoraussetzungen

- Limex MIDI System MPRX
